Dear Industry,

Re: **Effective 1400, June 13, 2015, Bar Pilots
will implement the following restriction:**

Inbound vessels (only) with a freshwater draft of 38' or greater shall enter Southwest Pass 5 hours BEFORE to 2 hours AFTER the NOAA posted high tide at Southwest Pass to help negate the effects of flocculation reported in Southwest Pass.

Nothing in this recommendation prevents the individual pilot from using his/her own discretion. The final determination will be made by the Pilot on board.

Please free to contact me at any time regarding this restriction. We will keep you updated as changes occur.

Best Regards,

Michael R. Lorino
